

To whom it may concern

After my CD player was stolen from my vehicle I decided to give XM radio a chance. It is by far the best vehicle investment one can make besides the oil change. Its incredible variety of channels means that never again will a passenger of my car feel left out because of limited music. Local weather coverage would only add to an already great service. Besides cable t.v., XM radio is the only other entertainment medium I currently subscribe to and I would without a doubt cancel my cable television before I cancel my XM.

Sincerly yours,
Jeremiah Sample
